PROFESSIONAL SUMMARY

Technology graduate (B.Tech CSIT, 2026) combining engineering delivery with business exposure: building Spring Boot APIs and MySQL databases at Ambula Technology, managing CRM workflows for 500+ leads and building Power BI dashboards at Infinity Learn, and selected for the McKinsey Forward Program. Translates business requirements into technical solutions and communicates clearly with cross-functional stakeholders.

TECHNICAL SKILLS

Technology: Java, Spring Boot, REST APIs, Node.js, Express.js, React.js, SQL, MySQL, MongoDB, Git, Postman, Cloud Computing
Business and Process: Requirements understanding, CRM workflow management, lead tracking, workflow automation, cross-functional collaboration
Reporting and Delivery: Power BI dashboards, Agile/Scrum, SDLC, API documentation, debugging

PROFESSIONAL EXPERIENCE

Platform Software Engineer | Ambula Technology — Aug 2026 – Present
- Translated client and reporting requirements into Spring Boot REST services and MySQL schemas used by client applications.
- Partnered with cross-functional teams in Agile sprints, delivering features on deadline and keeping releases stable through defect fixes.
- Documented API behavior so the frontend team could integrate independently.

Business Development Associate Intern | Infinity Learn — May 2026 – Aug 2026
- Managed 500+ active leads on LeadSquared CRM, configuring workflow automations, access controls and lead field structures.
- Built Power BI dashboards tracking outreach performance, follow-up rates and conversions for the sales team.

PROJECTS

AI Market Trend Assistant | React, Vite, Node.js, Express, Recharts — GitHub: AI-Trend-Assistant
- Built a dashboard of 10 AI market trends with live search, category/sector/status filters, sorting and interactive 12-month Recharts trend charts.
- Developed Express REST APIs for trends, a conversational market assistant and a 4-step proposal generator that produces an 8-slide executive deck with speaker notes and ROI projections; restricted the backend with a CORS whitelist.

JOB-BOT: AI Job Application Assistant | Java 21, Spring Boot, MySQL, Docker, Groq — GitHub: JOB-BOT
- Built a Spring Boot app that fetches jobs from 5 public APIs (Greenhouse, Lever, Ashby, Workable, RemoteOK), stores them in MySQL with Spring Data JPA and runs a daily scheduled scan.
- Integrated Groq (Llama 3.3 70B) and Ollama to score each job 0-100 against an uploaded PDF resume (PDFBox) and draft cover letters for high matches; prompts forbid fabricating experience and applications stay manual-submit only.
- Added CSV export, email alerts, Swagger API docs and a Docker Compose setup with an H2 demo profile.

RecipeHub: Food Recipe Web Application | MERN Stack, JWT, MongoDB — GitHub: food-recipe-app
- Built a full-stack recipe platform with a React 19 frontend and Node.js/Express REST backend: JWT auth with bcrypt hashing, recipe CRUD with author/admin access control, star ratings and saved recipes.
- Used MongoDB text indexes for full-text search with pagination and category/difficulty/tag filters; hardened the API with Helmet, CORS allowlist and rate limiting; deployed on Vercel.

Developer Portfolio Website | HTML, CSS, JavaScript, GitHub Pages — Live: vinayviratwork.github.io
- Built a responsive portfolio with plain HTML, CSS and vanilla JavaScript (no frameworks); project case studies and a role-based resume switcher (Backend, Full Stack, General) with PDF previews are driven from data files.

EDUCATION

B.Tech, Computer Science and Information Technology (CSIT) — 2022 – 2026
ITER, SOA University, Bhubaneswar | CGPA: 6.49/10
Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering, Cloud Computing

CERTIFICATIONS

- HackerRank Verified: SQL (Basic and Intermediate), Problem Solving (Intermediate), 2025
- Generative AI and AI Agents (GUVI/HCL), 2026

LEADERSHIP

- McKinsey Forward Program: selected participant (Oct–Dec 2026, ongoing) in a competitive business problem-solving program.
- Student Coordinator, PROXIMA HR Summit: one of 15 head coordinators; managed volunteers and coordinated 20+ of 80+ HR professionals over a two-day summit.
- Captain, SOA Kabaddi Team: coordinated 7 playing members and 5 substitutes, handling logistics and team communication.
