VINAY VIRAT

DATA ANALYSIS | SQL | POWER BI AND BUSINESS REPORTING

Saharsa, Bihar, India | +91-8893770796 | vinayviratoff@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data-driven B.Tech CSIT graduate (2026) with SQL, Power BI and Python skills and hands-on experience turning CRM and operational data into dashboards that sales teams act on. Managed 500+ active leads on LeadSquared CRM and built Power BI dashboards for outreach, follow-up and conversion tracking. Comfortable designing MySQL schemas and writing SQL for reporting, with an engineering background that makes working with databases and APIs straightforward. Seeking entry-level data analyst and business intelligence roles.

TECHNICAL SKILLS

Analytics and BI: Power BI dashboards, outreach, follow-up and conversion reporting, KPI tracking
Languages: SQL, Python, Java, JavaScript
Databases: MySQL, MongoDB, DBMS, database schema design, SQL queries
Business Data Operations: LeadSquared CRM, workflow automation, lead management, access controls
Tools: Git, Postman, REST APIs, Agile/Scrum, Data Structures and Algorithms

PROFESSIONAL EXPERIENCE

Business Development Associate Intern | Infinity Learn — May 2026 – Aug 2026

- Managed 500+ active leads on LeadSquared CRM, structuring lead fields, workflow automations and access controls to support reliable tracking and reporting.
- Built Power BI dashboards tracking outreach performance, follow-up rates and conversions for the sales team.

Platform Software Engineer | Ambula Technology — Aug 2026 – Present

- Designed normalized MySQL schemas and wrote SQL queries to support application logic and reporting requirements.
- Developed Spring Boot REST endpoints that feed client applications and reporting tools with reliable data.
- Debugged backend defects and collaborated with cross-functional teams in Agile sprints.

PROJECTS

AI Market Trend Assistant | React, Vite, Node.js, Express, Recharts — GitHub: AI-Trend-Assistant

- Built a dashboard of 10 AI market trends with live search, category/sector/status filters, sorting and interactive 12-month Recharts trend charts.
- Developed Express REST APIs for trends, a conversational market assistant and a 4-step proposal generator that produces an 8-slide executive deck with speaker notes and ROI projections; restricted the backend with a CORS whitelist.

JOB-BOT: AI Job Application Assistant | Java 21, Spring Boot, MySQL, Docker, Groq — GitHub: JOB-BOT

- Built a Spring Boot app that fetches jobs from 5 public APIs (Greenhouse, Lever, Ashby, Workable, RemoteOK), stores them in MySQL with Spring Data JPA and runs a daily scheduled scan.
- Integrated Groq (Llama 3.3 70B) and Ollama to score each job 0-100 against an uploaded PDF resume (PDFBox) and draft cover letters for high matches; prompts forbid fabricating experience and applications stay manual-submit only.

RecipeHub: Food Recipe Web Application | MERN Stack, JWT, MongoDB — GitHub: food-recipe-app

- Built a full-stack recipe platform with a React 19 frontend and Node.js/Express REST backend: JWT auth with bcrypt hashing, recipe CRUD with author/admin access control, star ratings and saved recipes.
- Used MongoDB text indexes for full-text search with pagination and category/difficulty/tag filters; hardened the API with Helmet, CORS allowlist and rate limiting; deployed on Vercel.

Developer Portfolio Website | HTML, CSS, JavaScript, GitHub Pages — Live: vinayviratwork.github.io

- Built a responsive portfolio with plain HTML, CSS and vanilla JavaScript (no frameworks); project case studies and a role-based resume switcher (Backend, Full Stack, General) with PDF previews are driven from data files.

EDUCATION

B.Tech, Computer Science and Information Technology (CSIT) — 2022 – 2026
ITER, SOA University, Bhubaneswar | CGPA: 6.49/10
Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering, Cloud Computing

CERTIFICATIONS

- HackerRank Verified: SQL (Basic and Intermediate), Problem Solving (Intermediate), 2025
- Generative AI and AI Agents (GUVI/HCL), 2026

LEADERSHIP

- Selected for the McKinsey Forward Program (Oct–Dec 2026, ongoing)
- Student Coordinator, PROXIMA HR Summit; Captain, SOA Kabaddi Team
