PROFESSIONAL SUMMARY

Technology graduate (B.Tech CSIT, 2026) combining engineering delivery with business exposure: building Spring Boot APIs and MySQL databases at Ambula Technology, managing CRM workflows for 500+ leads and building Power BI dashboards at Infinity Learn, and selected for the McKinsey Forward Program. Translates business requirements into technical solutions and communicates clearly with cross-functional stakeholders.

SKILLS AND CERTIFICATIONS

Technology: Java, Spring Boot, REST APIs, Node.js, Express.js, React.js, SQL, MySQL, MongoDB, Git, Postman, Cloud Computing

Business and Process: Requirements understanding, CRM workflow management, lead tracking, workflow automation, cross-functional collaboration

Reporting and Delivery: Power BI dashboards, Agile/Scrum, SDLC, API documentation, debugging

Certifications: HackerRank Verified: SQL (Basic and Intermediate), Problem Solving (Intermediate), 2025; Generative AI and AI Agents (GUVI/HCL), 2026

EDUCATION

B.Tech, Computer Science and Information Technology (CSIT) 2022 – 2026

ITER, SOA University, Bhubaneswar | CGPA: 6.49/10

Coursework: Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering, Cloud Computing

PROFESSIONAL EXPERIENCE

Platform Software Engineer | Ambula Technology Aug 2026 – Present

- Translated client and reporting requirements into Spring Boot REST services and MySQL schemas used by client applications.
- Partnered with cross-functional teams in Agile sprints, delivering features on deadline and keeping releases stable through defect fixes.
- Documented API behavior so the frontend team could integrate independently.

Business Development Associate Intern | Infinity Learn May 2026 – Aug 2026

- Managed 500+ active leads on LeadSquared CRM, configuring workflow automations, access controls and lead field structures.
- Built Power BI dashboards tracking outreach performance, follow-up rates and conversions for the sales team.

LEADERSHIP AND IMPACT

- **McKinsey Forward Program:** selected participant (Oct–Dec 2026, ongoing) in a competitive business problem-solving program.
- **Student Coordinator, PROXIMA HR Summit:** one of 15 head coordinators; managed volunteers and coordinated 20+ of 80+ HR professionals over a two-day summit.
- **Captain, SOA Kabaddi Team:** coordinated 7 playing members and 5 substitutes, handling logistics and team communication.

PROJECTS

Food Recipe Web Application | MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT

- Built a full-stack application with a React.js frontend and a Node.js/Express.js REST backend.
- Implemented JWT-based role access control across frontend routes and backend endpoints.

RESTful Student Portal API | Java, Spring Boot, MySQL, JWT, Git

- Built REST endpoints and a normalized MySQL schema with input validation.
- Implemented JWT-based authentication and documented the API for frontend integration.
